ARTEM SAPRYKIN

Product Manager with experience in transforming digital products and internal platforms. Led the end-to-end product cycle: discovery → hypothesis formation → MVP → launch → iterations based on metrics and feedback. Strengths include restructuring and integrating user scenarios, product development through funnels, automation, and AI tools. Achieved measurable business results: process optimization and savings of >15,000 euro/year, reduction in cost/time of operations.

WORK EXPERIENCE

FUTURETODAY

Product Manager| Jan'24 - Present   *Russia, Moscow (Remote)*

- Managed a portfolio of internal products: gathering stakeholder requirements (HR, recruiting, operations, media) → forming JTBD → delivery → support.
- Collected requirements from several departments and turned them into a single product backlog.
- Launched MVP microservices and tools for internal users: task setting, roadmap, backlog, prioritization, launch, and iterations based on results.
- Implemented AI tools and automation, reducing manual labor and speeding up processes in departments.
- Developed and launched chatbots/communication solutions for recruiting projects (25,000+ participants) — built a seamless user flow: login → scenarios → support → feedback.
- Established regular communication with stakeholders: status, synchronization of expectations, risk and deadline management.
- Achieved measurable results: savings of >15,000 euro/year through automation and reduced labor costs.

MYSEVEN

Product Manager | Jun'22 - May'23   *UAE (Remote)*

- Conducted discovery: competitive analysis, user scenarios, hypothesis formation.
- Participated in UX design (prototypes, flow coordination).
- Organized delivery in Scrum (planning, grooming, daily, review/retro).

ANTILATENCY

Community Manager | Nov'21 - Jan'24   *Russia, Voronezh*
                                                                        Cyprus, Limassol (Remote)

- Created and scaled a Discord community to 500+ active users, developing engagement and retention.
- Set up support processes (helpflow), reducing request processing time.
- Acted as Voice of Customer: systematized feedback, formed suggestions for improvement.

EDUCATION

VORONEZH STATE UNIVERSITY   *Voronezh, Russia*
